

Available Dev Container Features

This table contains all official and community-supported [Dev Container Features](#) known at the time of crawling [each registered collection](#). This list is continuously updated with the latest available feature information. See the [Feature quick start repository](#) to add your own!

[Referencing a Feature](#) below can be done in the "features" section of a devcontainer.json.

Please note that if you need to report a Feature, you should do so through the registry hosting the Feature.

To add your own collection to this list, please create a PR editing [this yaml file](#).
